

Corporation Out of State

May 2009

“The definition of Indiana Health Care Corporation includes these elements to qualify:

- As one of its functions, it provides health care;
- Is organized or registered under state law; and
- Is determined to be eligible for coverage as health care provider under this article for its health care function.

We (Indiana Department of Insurance) interpret, registered under state law, to mean organized or registered under Indiana law, although there has never been a case interpreting it.

Thus, the Indiana Patient Compensation Fund’s position is that out of state corporations must file with the Indiana Secretary of State before qualifying with the Indiana Patients Compensation Fund.”
